

# SYSTEMS BIOLOGY OF COLORECTAL CANCER

WEDNESDAY, MARCH 20 2013, 9.00-16.45  
MEMORIAL ROOM, QUEEN'S COLLEGE, OXFORD

- 09.00 - 09.10      **Welcome**  
Ian Tomlinson, University of Oxford, UK
- 09.10 - 09.55      **Germline and somatic DNA polymerase mutations in colorectal and endometrial cancers**  
Ian Tomlinson, University of Oxford, UK
- 09.55 - 10.40      **Genetics of tumor susceptibility; from genes to genomes.**  
Lauri Aaltonen, University of Helsinki, Finland
- 10.40 - 11.00      *Coffee break*
- 11.00 - 11.45      **Genetic effects on the normal colon and tumor transcriptomes**  
Emmanouil Dermitzakis, Universite de Geneve, Switzerland
- 11.45 - 12.30      **Impact and functional basis of common variants influencing colorectal cancer risk**  
Richard Houlston, Institute of Cancer Research, UK
- 12.30 - 13.30      *Lunch break*
- 13.30 - 14.15      **From Genotype to Phenotype: A predictive approach**  
Ohad Manor, Weizmann Institute, Israel
- 14.15 - 15.00      **Molecular alterations in crc in relation to clinical end-points**  
Torben Ørntoft, Aarhus University Hospital, Skejby, Denmark
- 15.00 - 15.45      **Top Colorectal Cancer Risk SNP Works Through Its Effect on Myc**  
Jussi Taipale, Karolinska Institutet, Sweden
- 15.45 - 16.00      *Coffee break*
- 16.00 - 16.45      **From promoters to drug targets.**  
Alexander Kel, geneXplain, Germany
